

CELEBRATE EARTH MONTH WITH

Earth Retention

APRIL 2024

INSIDE THIS ISSUE

Discover our eco-friendly retaining wall options

Project Spotlight: Flex MSE® installation in Jupiter, FL

Earth Retention Proudly Sponsors "March for Veterans: Pickleball Tournament Fundraiser"

As we celebrate Earth Month, let's reflect on sustainable choices that benefit our planet. At Earth Retention, we're proud to offer eco-friendly retaining wall options.

 Flex MSE® Vegetated Wall System

 Steepened reinforced slopes with wire forms and vegetated facing

 MSE wire retaining walls using hot-dipped galvanized baskets and rock facing

These alternatives not only lower transportation costs and reduce carbon footprints but also enhance the natural beauty of the landscape.

Project Spotlight: Distribution Warehouse Jupiter, FL

To maximize warehouse space and still provide ample parking for trucks for this distribution center in Jupiter, FL, the designer had to get asphalt, curb, and gutter right on the shoreline of a pond.

Earth Retention provided the design for this FlexMSE® vegetated wall, which is well-suited for areas where water meets land, promising durability and natural aesthetics. With hydro seeding and Florida's abundant sunshine, this wall will seamlessly blend into its natural surroundings!

**Earth Retention Proudly
Sponsors "March for
Veterans: Pickleball
Tournament Fundraiser"**

Join us for an exciting day of sport and camaraderie at the "March for Veterans: Pickleball Tournament Fundraiser" hosted by ATL Vets and MVP on April 27. Earth Retention is sponsoring this round-robin style tournament promising a day of fun and competitive pickleball action, all while supporting local veterans and their families!
