FREDERICK COUNTY, MD PUBLIC SAFETY TRAINING FACILITY

TOP NEWS OF THE MONTH

At Earth Retention, we are committed to ensuring your retaining wall projects are not just successful, but also a testament to our philosophy of "Design, Supply, Support." This belief is at the heart of everything we do, from creating lasting retaining wall designs to providing a broad array of earth retention products, including welded wire forms, geogrids, geotextile fabrics, and drainage solutions. We're with you every step of the way, from the very first conversation to the completion of your project, ensuring a smooth and supportive journey to success.

◀◀ THE FREDERICK COUNTY, MD PUBLIC SAFETY TRAINING FACILITY ▶▶

The Frederick County, MD Public Safety Training Facility provides training exercises for first responders in “real world situations” with safety as the primary focus.

Earth Retention provided engineered drawings for two segmental retaining walls, totaling approximately 5,000 square feet. One particular factor that had to be considered was the karst topography as identified in the geotechnical report. Despite these challenges, our team successfully contributed to a project that plays a crucial role in preparing those who ensure our safety every day. We are happy to have been a part of this significant project, which ultimately benefits us all by enhancing the readiness and effectiveness of our first responders.
