PROJECT SPOTLIGHT: **THE CROSSINGS OF DAWSONVILLE**

The Crossings of Dawsonville is a multi-family apartment complex located 1/2-miles from North Georgia Premium Outlets in Dawson County, GA. The project consisted of nine structures combining the aesthetics of segmental block retaining walls, vegetated wire form slopes, and rock-faced, galvanized wire form walls. The entrance road to the development is supported on both sides by 40-ft, rock-faced galvanized wire form walls. A 52-ft wall constructed with the lower 1/3 as rock-faced galvanized and the remaining 2/3 as vegetated wire form slope surround the site detention pond. The remaining walls are dispersed across the challenging site with more than 125-ft of grade change.
